

# Dr. James Speiser

Since 1989, I've been practicing in what is considered to be among the most advanced medical and surgical practices in the state of Indiana. My mission has been to provide the veterinary community with a reliable and affordable referral option for complex medical and surgical cases as well as critical care.

Continuing education is the cornerstone of my practice. I feel this is essential to keep abreast of the latest techniques, in order to provide my patients with the finest care available.

- Neurosurgery

CAT Scan Area

Oral Surgery Suite

Endoscopy Area

Ultrasound Suite

Digital Radiography Suite

Canine Rehabilitation

## What We Do

Upon arrival, the doctor will review your records, take a complete history and perform a detailed examination. These steps become the basis for your pet's diagnostic work-up and treatment.

Our dedicated staff of doctors and veterinary technicians work around-the-clock monitoring, treating, and caring for your pet.

Communication at our hospital is ongoing, with daily updates to the pet owner and referring veterinarian.

Upon discharge, a detailed synopsis of every case is mailed to your veterinarian, along with a copy of your pet's discharge instructions, laboratory work, and radiographs.

The information we provide you and your veterinarian will ensure the best possible care after your pet goes home.

IVR is an AAHA certified critical care hospital, open 24/7/365.

## 24 Hour Scheduling

Clients are seen by scheduled appointments. However, if your veterinarian would like to refer you the same day, or after hours, our facility can accommodate you.

If a specialist is not immediately available, the emergency doctor on duty will see your pet and immediately contact the specialist for a consultation regarding your pet's condition.

Many times animals need to be sedated for radiographs or tests. We ask that you not feed your pet within 12 hours of scheduled appointments.

In order to hasten a diagnosis, please bring any laboratory results or radiographs your referring veterinarian may have taken.

Our facility is an extension of your veterinarian. All pets are seen for their referred problem only. Routine veterinary care is not performed.

## Estimates & Fees

All clients are given an itemized estimate upon examination detailing the initial 24 to 48 hours of hospitalization. A deposit of half the estimate is due upon admission.

Clients are informed daily of their fees by a doctor or a technician. Balances are paid upon discharge unless prior arrangements have been made.

You may make payments by Cash, Check, Mastercard, Visa, Discover or Care Credit.

Suture removal after surgical procedures is performed at no charge.
